SUMMARY

Senior Frontend Engineer with 8+ years of experience in building scalable web applications using React.js, Next.js, and JavaScript (ES6+). Expertise in developing reusable component libraries, integrating RESTful APIs, and optimizing web performance through techniques like lazy loading, code splitting, and server-side rendering (SSR). Proven track record of leading cross-functional teams in Agile/Scrum environments and delivering high-quality, responsive user interfaces. Experienced in migrating legacy systems to modern architectures and improving Core Web Vitals to enhance user experience and performance.

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js, JavaScript (ES6+), TypeScript, HTML, CSS3
- **Styling:** SCSS, LESS, Bootstrap
- **State Management:** Context API (Redux if applicable)
- **Web Technologies:** RESTful APIs, API Integration, JSON
- **Performance:** Web Performance Optimization, Lazy Loading, Code Splitting
- **Tools:** Git, AEM UI, Chrome DevTools
- **Methodologies:** Agile, Scrum
- **AI and productivity:** GitHub Copilot, Generative AI, Prompt Engineering

WORK EXPERIENCE

UST | Senior Software Engineer

April 2019 - Present

- **Project Leadership & Strategy:** Led cross-functional teams of up to 6 engineers in an Agile/Scrum environment, managing sprint planning, task estimation, and on-time delivery.
- **Technical Excellence:** Spearheaded the development of a reusable component library used across 5+ major client projects, reducing frontend development time by 30% for new feature releases.
- **Code Quality & Mentorship:** Conducted rigorous code reviews and supervised task planning to streamline deployments for QA and UAT testing.
- **Productivity:** Leveraged GitHub Copilot and prompt engineering techniques to accelerate development and reduce repetitive coding effort

Key Engagements

Anthem Inc. (EAP, Client Onboarding & Broker Microsite)

Websites: www.anthem.eap.com | www.agentpulse.anthem.com

Tech Stack: React, JavaScript (ES6), JQuery, SCSS, HTML5, API Integration (Auth/Tokens), GIT.

- **Leadership & Delivery:** Managed a cross-functional team of 6 engineers to deliver designs, achieving a 100% on-time delivery rate for high-priority client launches.
- **Architecture & Scalability:** Architected a unified UI library that served as the foundational design system for Anthem's broker microsite ecosystem, ensuring 100% brand consistency across multiple workstreams.
- **Technical Implementation:** Developed secure API integrations for login/signup workflows, search results, and complex filtering systems.
- **Quality Assurance:** Lowered post-release bug reports by 25% by implementing rigorous code review standards and mentoring junior developers on clean architecture and ES6+ best practices.
- **Optimization:** Ensured 100% cross-browser compatibility and reused/modified library components to improve development efficiency across the microsite ecosystem.

UST SmartOps (www.ust.com/smartops)

Tech Stack: Angular, JavaScript (ES6), HTML5, SCSS, GIT.

- Spearheaded the UI migration of a legacy enterprise product to a multi-level reusable architecture, reducing the overall frontend bundle size by 35% and decreasing the time-to-market for new features by 2 weeks.

Globe Telecom (www.globe.com.ph)

Tech Stack: Backbone.js, JQuery, PUG, SCSS, Bootstrap, GIT.

- Mentored a team of 3 junior developers and successfully delivered 40+ API-integrated components, maintaining zero regression issues in the primary codebase while increasing team sprint velocity by 15%

Hero MotoCorp (www.heromotocorp.com)

Tech Stack: React, JavaScript (ES6), JQuery, HTML5, SCSS, GIT.

- Developed a library of 10+ high-performance UI components featuring complex animations, resulting in a 25% increase in user session duration and achieving 90+ Lighthouse performance scores through optimized API integration.
- Created a filter system for all of their two-wheelers based on API data.

Deluxe (www.deluxe.com)

Tech Stack: AEM (Adobe Experience Manager), JavaScript (ES6), JQuery, HTML5, SCSS, GIT.

- Refactored and enhanced 30+ core library components for a global design system, reducing design-to-code inconsistency by 40% and improving frontend maintenance efficiency across the organization.
- Enhanced 50+ components for a major platform upgrade, ensuring 100% design fidelity and reducing frontend QA cycles by 20%.

Cavisson Systems | Software Engineer

Jan 2018 - Jan 2019

Product: NETOCEAN (www.cavisson.com)

Tech Stack: Angular 2, TypeScript, HTML5, CSS3.

- System Development: Engineered a high-performance UI for NETOCEAN capable of visualizing thousands of real-time server requests per second, reducing diagnostic latency for system administrators.
- Architecture: Utilized Angular 2 to build complex, component-based structures that transformed raw server logs into intuitive dashboards, increasing data interpretation speed by 30%.
- Collaboration: Partnered with backend teams to synchronize frontend data flows with server-side responses, ensuring 99.9% data accuracy in recording critical server diagnostic metrics.
- Design Execution: Transformed complex technical requirements into a streamlined interface that reduced the time required for developers to identify server bottlenecks by 25%.

EDUCATION

Bachelor of Technology | Computer Science & Engineering
GIET, Gunupur, Odisha

2014 - 2018

12th(Higher Secondary Education)
Agrasen D.A.V Public School, Bharechnagar, Jharkhand

2014

ACHIEVEMENTS AND RECOGNITION

- Led and mentored teams of up to 6 engineers across multiple enterprise projects
- Successfully delivered large-scale UI platforms for global clients under aggressive timelines
- Directed migration of legacy systems to modern frontend architectures
- Two-time runner-up in the GIET Badminton Championship

ADDITIONAL INFORMATION

- **Languages:** Hindi, English
- **Hobbies:** Badminton and Gaming
- **Current Location:** Bangalore, Karnataka, India
